

introducing the new

swakopmund
guesthouse

What was fresh and different in 2008 was now in need of a complete revamp. We ripped everything out and created a totally new and modern and contemporary look.

We have sacrificed three standard rooms to create new luxury suites – each complete with a separate lounge that allows to be converted into a family room.

the suites

The new suites feature a fire place (gas). All rooms now have airconditioning and underfloor heating in the bathrooms.

Smart TV's and lightning fast wifi rounds off our elevated guest experience.

We have closed off the backyard for secure parking, redone the gardens, redone the paving and gave the old lady a complete new paintjob.

15 years after we started, we are again confident to say that the Swakopmund Guesthouse is the finest adress in town.

Everything is new, from the kettle to the product we use for our amenities.

All the rooms look the same, it is just the size that differs between a standard room, luxury room and the suites.

We say cheers to another 15 years and thank you all for your support over the years. Please come and have a look, stay a night and keep sending us clients.
